

Lens Packages / Progressive Lenses

There are 4 lenses we use on the progressive lens package sheets. These should meet all your progressive fitting needs. We are however capable of getting most current brands for those patients that request a certain name brand lenses.

BASIC PACKAGE

Natural

Comparable to the Navigator lens
Available in 1.50, Poly, Glass and 1.60 Clear
Minimum fitting height 18
Available in Transitions grey only. (NO POLARIZED)
Can be AR coated, Crizal Avance UV.
Has a standard reading and intermediate width. Good for lower powers.

PREMIUM PACKAGE

Accolade:

Comparable to the Varilux lens
Available in 1.50, Poly, Trivex, 1.60 and 1.67
Minimum fitting height 17
Available in Transitions Grey or Brown all types and Polarized in Poly.
UV protection is built in and includes AR coating, Crizal Avance UV.
Has twice the standard reading and intermediate area of the basic.

ULTIMATE PACKAGE

Ideal Advance

Comparable to the Kodak Unique lens
The digital lens design provides a wider clearer periphery than regular progressives.
Available in 1.50, Poly, 1.60 and 1.67.
Minimum fitting height 17
Available in Transitions Grey or Brown and Polarized in 1.50 and Poly.
Wide intermediate and reading.
AR coating, Crizal Avance UV.

SHAMIR AUTO 2 FIXED PACKAGE

The best customized digital HD design.
Available in 1.50, Poly, Trivex, 1.60 and 1.67
Minimum fitting height 14 to 20.
Available in Transitions Grey or Brown and Polarized in 1.50.
AR coating Crizal Avance UV.
Can customize the reading and intermediate size based on the patient's needs.
This lens has less than a 1% non-adapt rate if fitted properly.
If fitting a past ST-28 wearer, use design #11 for best results.

Lens packages/Single vision
